

**Due: See WebCampus for due date and Submission info.**

Assignment should be submitted via pdf upload on the due date. Please write neatly (type is better) and explain your work with justifications for your reasoning. Figures should be professional in quality and the manner in which they are presented.

## ***Technical Presentation—Self Critique***

Review the video of your presentation and provide a thoughtful critique of how well you did. Consider the following questions.

1. How effectively do you feel you expressed what you intended to say?
2. How was your delivery? Any distracting mannerisms, body motions, speech problems, volume, clarity, etc.? Was it professional (appropriate for the audience)?
3. How was your personal appearance and physical presentation? Were you dressed appropriately? Did you act in a professional manner?
4. How effective were your slides in your talk? Did you have enough? Too many? Were they easy to navigate while speaking?
5. How effectively do you believe you communicated the technical aspects of your talk? Did they follow it all? Did you see any evidence that they understood? What?
6. What did you do to prepare? How effective were your preparations?
7. How well did you manage your speaking time? How did you handle the time for questions and answers? Did you do anything in particular to manage your time?
8. Please provide other thoughts you may have on what you learned from this exercise.
